

Retail One Addon

INTRODUCTION

SOLUONE

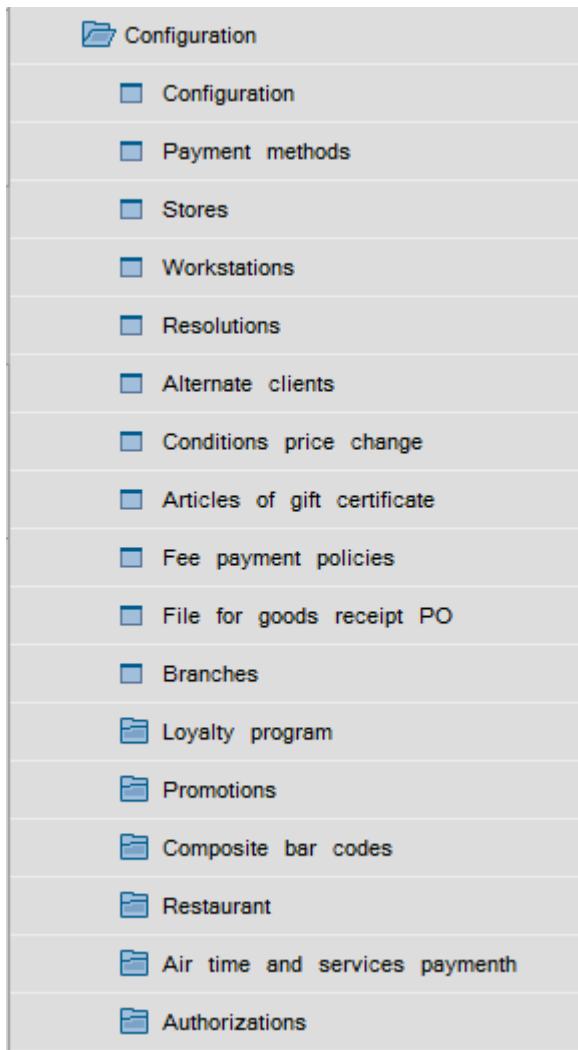

The Retail One addon is an interface for create and configure the Retail One point of sales, this addon run into SAP interface and use UI API for build the screens.

In Retail One we have two folders, Configuration and Operations.

In configuration folder are located all the screen like Store, Workstations, Restaurant, etc.

In operation folder are two screen, one for create a global invoice from deliveries, and another for apply the payment to these global invoices.

Configurations options

- Configuration

The screenshot shows a 'Configuration' dialog box with a title bar and standard window controls. It features a tabbed interface with the following tabs: General, Sales, Purchasing, Inventory transfer, and Regionalization. The 'General' tab is active and contains a sub-section titled 'Flow control' with its own sub-tabs: Inventory, Mapping, Email, Server, and Several. The 'Inventory' sub-tab is selected, displaying a 'Retail One use' section with the following options:

- ☒ Grouping items
- ☒ Enable flow of special keys
- Scan items: (dropdown arrow)
- Search default items: (dropdown arrow)
- Lock screen (seconds):
- ☐ Synchronize SAP Exchange rate

At the bottom of the dialog are 'OK' and 'Cancel' buttons.

This screen I for set general parameters like transit warehouse, Email server, Electronic invoice, customer data, region special configuration, etc.
